to learn more about PPTI and hear more stories of hope. Our commitment is to help our patients achieve their best possible quality of life.

In my younger years I performed on flying trapezes with the Shrine Circus and Circus-Circus in Las Vegas. In 1990, they had to fuse my lower back. The disk was gone; it was bone to bone. As time went on it became a degenerative disease, the pain was unbearable. In 2008, I kept falling. I went to a doctor who said my spine was going to snap if I didn't get my back treated. It helped for a very short time. My quality of life became worse. I have never done well with pain meds. I was getting injections all the time. The disease continued to go higher up my back, into my lumbar, thoracic, and cervical vertebrae. At this point I had more than four surgeries. I had to leave my job and go on disability.

I finally heard about PPTI and Dr. Danko. Three years ago, I was able to get an appointment with Dr. Danko. I call him my miracle worker. The pain pump has changed my life. Before the pain pump my pain was so bad that my life had pretty much turned into going nowhere and living like a shut-in. Now I can do so many of the things that everyone else does. I'm so thankful for PPTI; I wish I would have heard about this years ago. I now can enjoy my life once again. I truly believe this could help so many. I want to share this information, so others don't have to suffer the way that I did and miss out on so many years of their lives.
