Pain Treatment Institute

Relieving pain, Restoring life.

“My relief was *instant*.”

I've had back pain for every bit of 5 years. I had a total hip replacement, which helped for awhile with my bad hip, but I was still having back issues. I went back and forth from my family doctor to the chiropractor with no relief from the pain. I told them, “I can't take this pain anymore.”

Finally I got referred to Dr. Danko at PPTI. He showed me exactly what was going on in my back and what he could do to help me. He recommended two procedures, one of which was the MILD procedure. My relief was instant. When I left surgery that day my sciatic nerve pain going down to my knees was gone and I was able to straighten up.

It used to be by the time I got ready for the day and walked to the living room, I had to hold on to whatever I could just to keep my balance because of the pain. Now I'm riding my lawn mower and doing yard work. I even helped my buddy clean his grain bins. Sure, I'm sometimes a little sore the next morning, but last year I was in too much pain to get off the couch.

I wish I would have had all this done years ago. I tell people with back pain or who have had old back surgery, “Go to Dr. Danko at PPTI. There are a lot of new procedures out there and Dr. Danko stays on top of things with all the new technology.”
